

# Software Engineering Internship- TransferWise, Tallinn.

We're looking for an **Engineering intern** to join our growing team in **Tallinn**. The role is a unique opportunity to jumpstart your career as an engineer with a product mindset, who will help millions of customers save money by using TransferWise. You will be taking on smaller projects or parts of a larger project and collaborating with engineers, designers and product owners in the team, to get input on implementation and decisions. With more time in this role, you'll understand the why and what behind the feature, rather than just the how to get something live. You'll also get more independent in shipping features on your own.

During the internship you will have your own mentor to help you learn and develop professionally and a buddy who will introduce you to Transferwise team, culture, events and activities.

Firstly, what is TransferWise?

Well, we're a global tech company with a big mission and a start up heart.

We believe money should travel as cheaply and quickly as email. Which is why we want to make moving money instant, transparent and eventually free.

Why join us?

A career at TransferWise offers radical amounts of freedom and autonomy, the ability to work see your impact immediately and have fun along the way.

We offer internships, graduate programmes and events like our famous Hackathon where you pitch ideas, solve problems and get real time feedback.

You'll have true impact from day one and be responsible for real business problems and own projects from end to end.

And because we know working at TransferWise means giving your best every day we strive for a good work life balance with team lunches, well-being weeks, office dogs and lots of fun social events.

Don't just take our word for though: *"What I liked the most was that my title as an intern was not a limit on what I could do. From day one I felt like I was part of the company and free to take on as much responsibility as I wanted."* Smaranda, TransferWise Engineering Intern 2018

Sounds good? If so, then check out [wi.se/software-engineering](https://wi.se/software-engineering)
