

A vacant job for a Data Wizard

dealing with Estonian healthcare data
in a leading data analysis company in Estonia,
Software Technology and Applications Competence Center

Where

Tartu, Ülikooli 2

When

As soon as possible

Requirements

Good Python writing and
Python packet management skills
Sense of responsibility
Enthusiasm for personal and team growth

Good if you know and have used before

Python packets:
pandas, numpy, luigi, estnltk
SQL and SQLAlchemy

What we offer

You will work together with a dedicated team
who is doing R&D upon the largest healthcare datasets in Estonia

Your work is focusing on data extraction pipelines:

- You will write and manage Luigi pipelines
- You will develop and improve our tools to extract facts from Estonian medical documents (including free text parts)
- You will maintain Python packets and their dependencies in our computational server so that all other researchers are happy

Work will be accepted as a mandatory practical training course
