Job Description

We are looking for a Front-End Web Developer for an internship role, who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. Your main goal is to define how the application looks as well as how it works.

Responsibilities

- Develop new user-facing features
- Strive to write clean code and automated tests
- Ensure the technical feasibility of UI/UX designs
- Optimize application for maximum speed and scalability
- Collaborate with other team members and stakeholders

Skills And Qualifications

- Good eye for clean / flat design
- Good understanding of web markup, including HTML5, CSS3
- Good understanding of client-side scripting and JavaScript frameworks, including jQuery
- Good understanding of front-end frameworks such as Semantic UI and Bootstrap.
- Knowledge of Angular 2 JS framework.
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as as Illustrator or Photoshop is a plus.
- Basic understanding of cross-browser compatibility issues and ways to work around them.
• Knowledge of code versioning tools, such as Git.
