

We are a software development company called **Ignite** ([www.ignite.ee](http://www.ignite.ee)) and here are some things you should know about us:

#### **Flat structure**

We believe that people are smart enough to manage and organize themselves.

#### **Different technologies**

Gain experience in areas like SaaS, project partnership and BlockTech.

#### **Work language is English**

We have an international team.

#### **Communication**

We are open to discussions and changes.

#### **Our offer:**

- You will become one of our talented people who helps to deliver quality software solutions on a daily basis.
- We provide professional guidance and plenty of challenges, so you can become the best in the field.
- Our specialists' excessive knowledge on creating software will be at your service.
- And of course, all your professional efforts will be well rewarded!

As a **Software Engineer Intern** in Ignite you will have the opportunity to participate in different stages of software development.

#### **Your challenge:**

- Designing, coding and debugging applications in various software languages;
- Support, maintain and document software functionality;
- Quality automation: unit, database and application integration tests;
- Analysis: software, code, requirements, system risk, software reliability; software review, identification of code metrics;
- Integrate software with existing systems.
