Internship – Front-End Developer

What you’ll do

We work with clients that are high-profile and are looking to make their Glia implementation as successful as possible. Your responsibility is to help them go from gadget to gold (from a novelty on their website to something that drives business value). You will be assembling implementation plans, interfacing with project teams and growing client relationships. Glia also supports your self-development and encourages you to get more skilled on your field.

Requirements

- Bachelor's in Computer Science or equivalent
- Strong knowledge of HTML, CSS, JS
- Write clean code and automated tests
- Have a strong sense of good UX and design
- Attention to visual as well as messaging detail
- Strong organizational and planning skills
- Self-starter with the energy, drive and determination to accomplish goals Passion for new technology
- Currently living in Tartu, Estonia or willing to relocate

Benefits

- Exciting, dynamic and rapid growth environment
- Collaboration with a team of world-class engineers
- Access to all the latest tools and equipment you’ll need to work your magic
- Team events including sauna retreats, nights out, paintballing and travel
- Sports membership of your choosing (you have to commit to going 3x per week!)
- Diverse workplace: 18 languages and 7 countries represented
- Competitive base salary & benefits
- Participation in technical and design meetups (local and international)

How to apply?

To apply please send an email to careers@glia.com including your resume/Linkedin, Github, and a cover letter that explains your motivation for joining the team.
