

TransferWise Engineering Bootcamp - Join us for the summer!

An internship at TransferWise is your chance to develop your skills within one of [Europe's fastest growing companies](#). You'll learn by doing, working directly with our teams to take on real-world projects that impact millions of people around the world.

Our **paid Product Engineering Bootcamp** will start in **June** and last for **3 months**. You can apply to join one of our engineering hubs in Tallinn, London, Budapest, Cherkasy or Singapore. You'll join one of our teams as a developer and build products that matter. There will also be the opportunity to join us in a permanent role at the end of the internship.

Who should apply?

We're looking for people who are passionate about learning and building something that impacts the way the world works and lives. This opportunity is for you if:

- You're a massive tech nerd (like us) and love code in any shape or form
- You're kick-ass at full-stack modern web development (JVM and JS experience helps)
- Have built cool stuff which you can explain to your grandma
- When the DB goes nuts and your code goes sideways you keep your wits and find a solution

“What I liked the most was that my title as an intern was not a limit on what I could do. From day one I felt like I was part of the company and free to take on as much responsibility as I wanted. I got to see how what I built resulted in immediate results of faster, more efficient operations of the product and impacted millions of customers” - Smaranda, 2018 Bootcamper

Check out our last year’s intern experience [here](#).

Application process:

- We’ll firstly review your application and see if you could be a fit for TransferWise. Make sure your CV is easy to read and clearly explains your achievements. Be sure to attach anything that shows your passion! Anything from your GitHub portfolio to blog posts you might have published
- If you’re successful in the application review, we'll do a little test on your technical abilities (via HackerRank), just so we know you're not getting in over your head
- We’ll then make sure you have some grasp on figuring out what people actually need, and how to provide that for them in our Engineering & Product Thinking Challenge

Timelines...

Please be aware that there will be some time in between application and coming back to you. The selection will kick off in March, as we will accept applications until end of February.

- Applications open: December, 2018
- Applications close: February, 2019
- We’ll let you know who will be interviewed: March, 2019
- Tech Test & Interviews: March & April, 2019
- We announce accepted interns: May, 2019
- Join TransferWise: June, 2019

Important note: We are not able to sponsor VISA's for our internship programs at this moment for people residing outside the EU. The same applies to our Cherkasy and Singapore office, for which we'll not be able to sponsor VISA at this time for applicants outside Ukraine or Singapore [if no right to work / valid

student visa (for Singapore) already in place for those countries]. Our official selection process starts in March, and ends in May. The bootcamp starts in June and ends in August.

A bit about TransferWise:

Since 2011, we've had a clear mission: **money without borders**. Built by and for people who live global lives, we're the fairest, easiest way to manage your money across borders.

We're just at the beginning of our story and we're growing at an incredible pace. We won't stop until anyone, anywhere can send, spend and receive money wherever they are, whatever they're doing. There's still heaps to do and we can't do it alone.

Our People:

At TransferWise, you'll be joining a movement of people who believe in a better, fairer, more transparent way of moving money around the world. You'll collaborate to do your best work and take on problems that no one has looked at before.

If you're keen to learn, grow, try new things and aren't afraid of a bold plan, you'll fit right in.

How we work:

At TransferWise our strategy emerges from the collective brainpower of all our people, who are organised in dozens of independent, **autonomous teams**. Teams stay closest to our customers, so they choose what problems to solve and where to spend the most time.

You'll experience radical levels of **ownership** and **empowerment** within your role. Plus the opportunity to see the direct impact of your work on our customers.
