Internship – Software Development

Who we are – maviance GmbH

We are a young international company with exciting products for the mobile/smartphone network that have been developed and are now ready to be launched. We are looking for someone excited to be part of this journey and give us the additional push to ride the waves of change, especially in the newly emerging and shaping markets.

As a young company, we believe in being agile and moving very fast. Therefore you shall be exposed to state of the art software engineering concepts like *Behavior/Test Driven Development, Specification by Example, Kanban/Scrum, Continuous Integration, Test Automation* etc just to name a few.

Your role

- Taking part in the conception, implementation and testing steps of our web applications
- Designing and implementing prototypes products, integrating applications with Facebook and Twitter
- Developing of our web and mobile applications as well as extending frameworks
- Testing our applications: system test, functional, usability and performance tests
- If you are interested in customer contact, you can support us in creating new documentation and possibly training videos with our users

You are

- Interested in new web/mobile technologies as well as emerging markets and products
- Paying attention to details and eager to learn
- Autonomous and team-work oriented
- **Fluent in English**; German and French are a plus
- Experienced in developing and testing web applications with **PHP** (Object Oriented PHP) or **HTML-5**
- Familiar with Framework Symfony 1.x/2.x

We offer

- A place within a young, dynamic and international team
- Participation in international projects while working closely with the management and thus gaining massive first-hand experience
- A wide variety of tasks which imply a lot of responsibilities and creativity
- The internship with a length of **4 months at least**, **starting as soon as possible**
- We are based in Germany, Leipzig (one of the most livable and cheapest German cities, close to Berlin)

Contact

To apply, please send an e-mail to <u>jobs [at] maviance [dot] com</u> consisting of:

- Subject **"Internship – Software Development"**
- **Resume**
- **Cover letter** which besides explaining your motivation answers the question "What was your best movie in 2014 and why?"
- **Any references, relevant certificates or samples of your work** (not mandatory, but appreciated)
